

AMENDMENT

Please rewrite claims 1, 3, and 20 as follows:

SUBC 1) 1. (amended) An electronic mail client, comprising:

A1 a) a plurality of integrated authoring and reading components, a first of said plurality of integrated authoring components for creating [a representation of a document including] an other than text portion of a document;

b) encoding means for automatically encoding said representations created with said authoring components into an Internet-compatible email message; and

c) decoding means for automatically decoding said representations encoded by said encoding means.

EX 3. (amended) An electronic mail client according to claim 1, wherein:

A2 said plurality of authoring components includes at least one component selected from the group consisting of a game component, a spreadsheet component, and a graphic editor component wherein at least two of said authoring components provide user interfaces different from each other.

SUB 20. (amended) A method of authoring a document and sending it by electronic mail, said method comprising:
